Sagar M S

Software Engineer

Bangalore, India | 2005sagarms@gmail.com | github.com/Sagarms2005 | linkedin.com/in/sagar-m-s-867102337 | leetcode.com/u/2005sagarms

SUMMARY

Software Engineer with hands-on experience in full-stack development, AWS cloud, automation, and AI-based applications. Skilled in Java, Python, Node.js, PHP, MySQL, REST APIs, Docker, and AWS.

EXPERIENCE

Software Engineer | IMTMA — Feb 2026 - Present

- Developed web applications using Java, Node.js, Python, PHP, and MySQL.
- Built AI-powered and automation solutions for exhibition and visitor-management applications.
- Integrated REST APIs, databases, and AWS cloud services for application deployment and operation.
- Worked on real-time monitoring, event applications, and AI-based solutions; developed and integrated AI-assisted features, APIs, and automation workflows for real-world applications.
- Managed Docker-based deployments, Nginx configuration, and AWS cloud infrastructure for application hosting.

Cloud Intern | Crystallize Technologies (640 Hours) — Feb 2023 - Apr 2023

- Worked with AWS services (EC2, S3, IAM, VPC) for deployment and testing.
- Assisted in CI/CD pipeline setup, debugging, and documentation.

PROJECTS

AI Event Photo Delivery System — Apr 2026 - Jul 2026

Tech: Flask, AWS Rekognition, MySQL, Node.js, PHP

- AI-powered event photo delivery system using Flask, AWS Rekognition and MySQL for face-based photo matching; backend logic built with Node.js, PHP and MySQL.
- Event management, photo upload and processing, and personalized gallery delivery with email notifications.
- Secure gallery access and automated photo distribution for event attendees.

Cloud-Based Web Deployment with CI/CD & Containers — Dec 2025 - Mar 2026

Tech: Docker, Docker Compose, AWS EC2, Nginx, IAM, GitHub Actions, S3, CloudWatch

- Containerized the application using Docker and Docker Compose and deployed on AWS EC2 with Nginx and IAM-based access.
- Implemented a GitHub Actions CI/CD pipeline and integrated S3 storage, CloudWatch monitoring, and billing alerts.

Blood Smear Segmentation using V-Net — Aug 2025 - Oct 2025

Tech: PyTorch, V-Net (deep learning)

- Developed a deep learning model using PyTorch and V-Net for automated leukemia cell segmentation.
- Processed blood smear medical images to identify and segment leukemia cells.

Digital Voting System — Aug 2024 - Oct 2024

Tech: JavaScript, Node.js, PHP, MySQL, HTML, CSS

- Built a secure OTP-authenticated voting platform with candidate management and live result visualization.
- Backend logic using Node.js, PHP and MySQL; responsive UI with modern animations.

TECHNICAL SKILLS

Languages:	Java, Python
Full-stack:	HTML, CSS, JavaScript, Node.js, PHP, MySQL, REST APIs, Flask
Cloud & DevOps:	AWS (EC2, S3, IAM, VPC, RDS), Docker, Docker Compose, CI/CD, GitHub Actions, CloudWatch, Linux, Nginx
AI / ML:	PyTorch, V-Net, AWS Rekognition
Tools:	Git, GitHub, VS Code, Google Colab, XAMPP
Core CS:	Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA - basics)

EDUCATION

Malnad College of Engineering — 2023 - 2026

Bachelor of Engineering, Computer Science | GPA: 8.2

Smt. L V Polytechnic — 2020 - 2023

CGPA: 9.2

CERTIFICATIONS

AWS Academy Graduate - Cloud Foundations | Data Science Certification | Infosys Springboard - Essentials of Cloud Computing | AWS Cloud Practitioner Essentials

ACHIEVEMENTS

- **LeetCode:** solved 100+ coding problems with consistent practice in Data Structures & Algorithms.
- **CodingBat:** practiced Java and Python programming problems covering logic, control flow, strings, arrays, and recursion.
- **GitHub:** maintained and developed multiple academic and real-world software projects.
